Mohamed Irfanullah M

Full Stack Developer

+91-6384081015 — mohamedirfan1720@gmail.com — LinkedIn — GitHub — Portfolio

Summary

Full Stack Developer with about 2 years of experience building scalable **REST** and **GraphQL APIs** with **Node.js**, **NestJS** and **Express**. Production experience with **MySQL**, **MongoDB**, **Redis/BullMQ**, **AWS** and **Docker**. Use AI tools (Claude, Cursor, OpenAI API) to speed up prototyping and delivery.

Experience

Software Engineer, OzziTech – Chennai, India — Dec 2025 – Present

- Designed **REST and GraphQL APIs** for B2B supply chain workflows, enabling data integration across multiple partner systems.
- Built order and delivery management with **BullMQ and Redis**, resolving concurrency issues in order processing.
- Optimized **Sequelize/MySQL** data models and removed N+1 queries in large-scale transaction systems.
- Implemented **WebSocket** live order and delivery tracking, plus **AWS S3** document storage and **AWS SNS** event-driven alerts.

Associate Software Engineer, GlobeWebizze Pvt Limited – Chennai, India — Nov 2024 – Dec 2025

- Built the initial REST and GraphQL APIs for B2B supply chain workflows between multiple partners.
- Modeled MySQL schemas with Sequelize ORM for high-volume transaction data.
- Delivered WebSocket-based live shipment tracking, giving partners real-time visibility into order status.

Projects

TaskFlow AI (Next.js, NestJS, MySQL, OpenAI API) – GitHub — August 2024

- Built an AI-powered project management tool with a **NestJS** backend and **Next.js 14** frontend; an OpenAI prompt pipeline turns a task title into a structured task breakdown.
- Implemented **Google/GitHub OAuth**, JWT refresh token rotation, role-based workspace access, and drag-and-drop Kanban boards.

Expense Tracker – MERN Stack Application – GitHub — August 2024

- Built a personal finance app (**React, Redux Toolkit, Node/Express, MongoDB**) with **JWT** auth, category-wise transaction tracking, and Chart.js reports.
- Added monthly budgets with **Nodemailer** email alerts when limits are exceeded; frontend deployed on Netlify.

Technical Skills

Languages: JavaScript, TypeScript, Python
Backend & Frontend: Node.js, Express.js, NestJS, GraphQL, React.js, Next.js, React Native
Databases & Queues: MySQL, MongoDB, Redis, BullMQ, Sequelize ORM
Cloud & DevOps: AWS (S3, SNS, EC2, Bedrock), Docker
AI: Claude, Cursor, OpenAI API, Prompt Engineering, Generative AI
Concepts: OOP, REST & GraphQL APIs, WebSockets, System Design Fundamentals

Education

Bachelor of Computer Application – Jamal Mohamed College, Tiruchirappalli — July 2020 – May 2023
CGPA: 8.6

Certifications

Full Stack Web Development – Coding Ninjas (2023–2024): Frontend, Backend, Generative AI
